Vaccinations	Dates · vaccine: _____		
Deworming	Dates · product: _____		
Health at sale · known conditions			
Other notes			

1. PET TERMS

1. The puppy is sold as a companion pet. It may not be bred, and a reference pedigree, if issued, carries no ownership transfer and cannot be used to register offspring.
2. The puppy may never be sold or given to a pet shop, auction or laboratory, or resold for profit.

2. HEALTH GUARANTEE

1. **First 15 days after handover.** If the puppy dies of an unexplained, sudden cause, it is exchanged for a puppy of the same breed. If parvovirus or distemper is diagnosed within the first 7 days, the purchase price is refunded. A veterinary report is required; the initial examination fee is paid by the Buyer. Harm caused by the Buyer's serious negligence is excluded.
2. **First year from birth — congenital and hereditary conditions.** If one of the conditions below is confirmed by a veterinary diagnosis within one year of birth, and the actual treatment cost exceeds the purchase price, the Seller contributes 50% of the purchase price.
   - Covered: patellar luxation grade 3 or above; congenital heart disease (PDA etc.); tracheal collapse; Alopecia X.
   - Patellar luxation and tracheal collapse are covered only if the dog has been kept at a healthy weight.
   - The Buyer tells the Seller the diagnosis and agrees the treatment plan before treatment begins. Treatment without prior agreement is not covered. In a life-threatening emergency, treat first and tell the Seller within 48 hours — the same terms apply.
   - Conditions declared under “Health at sale” are excluded. The original diagnosis and receipts are required. Other conditions, accident and neglect are excluded.
3. **For life — return.** If the Buyer can ever no longer keep the dog, it is returned to the Seller rather than passed to anyone else. There is no refund; the Seller takes the dog back without conditions and finds it a new home.

3. NOT COVERED

1. Preventive care — vaccinations, deworming, heartworm prevention — not kept up regularly. Until the vaccination course is complete the puppy must not meet other dogs.
2. Hypoglycaemia from irregular or insufficient feeding or water.

3. Digestive upsets from unsuitable food (bones, onion, garlic, chocolate, fish, shellfish, fruit stones, spicy food, etc.).
4. Concussion, fractures or injuries from knocks or falls.
5. Side effects of self-treatment.
6. Colds, skin conditions (mites, fungus), ear mites, tear staining, and normal differences in growth.
7. Infection picked up after handover (groomers, clinics, parks, transport).
8. Minor illness that is not one of the infectious diseases above — diarrhoea, colds, or temporary loss of appetite from travel stress.

4. SPECIAL TERMS

1. No refund or exchange for a change of mind, or for the puppy's temperament or coat colour.
2. If the puppy shows any sign of illness — poor appetite, vomiting, diarrhoea, coughing, nasal discharge — the Buyer contacts the Seller straight away and agrees the next step with the Seller. Action taken on the Buyer's own judgement is not covered.
3. The USD 500 deposit is non-refundable, as the puppy is shown to no one else once it is paid.

5. TRAVEL ABROAD

1. The import rules of the Buyer's country decide when the puppy may travel. Confirming them is the Buyer's responsibility. The Seller will never falsify records to shorten a waiting or quarantine period.
2. Transport costs are paid by the Buyer. Risk passes to the Buyer at handover — in person, or to the carrier where the puppy is shipped. The 15-day period starts on the day the puppy arrives with the Buyer.

6. LAW

This contract is governed by the laws of the Republic of Korea. Disputes are settled by the Suwon District Court, Yeoju Branch, Republic of Korea. Made in two copies, one for each party.

I have read and understood the terms above and agree to them.
